# FastMaint™ Maintenance Management Software from SMGlobal Inc.

Your FAST track to maintenance management™

What is FastMaint?

FastMaint is a Microsoft Windows™ based software package for small to mid-size maintenance teams. Fast to set up and use it is an affordable computerized maintenance management solution for organizations of all sizes. **FastMaint™ is one of the few maintenance software products to pass Microsoft's Verified For Windows XP certification test.** FastMaint is available in three editions; Basic (single user), Standard (single user) and Professional (multi-user).

## Need help with maintenance management?

FastMaint can be used for planning, managing & tracking preventive and planned maintenance of equipment and facilities. FastMaint can help organizations improve the quality of their maintenance systems while reducing the costs of labor and materials and increasing asset life. An easy to use interface will help users become productive quickly.

Useful features to help you

Track and estimate labor costs, material costs and inventory needs. Define global or individual working calendars with days off and holidays. Detect schedule conflicts and reduce overtime costs. Plan maintenance for any given period, print work orders and collect feedback. Use work order history to find problem patterns and more. FastMaint uses a Microsoft Jet™ (Access) database so many third party tools such as report writers, data extraction utilities and so on can extract information and integrate with it.

FastMaint Professional adds additional features such as multi-user support, data import/ export and a fast feedback feature that allows maintenance personnel to quickly identify and update pending work orders. Plus one has the option of using Microsoft SQL Server™ for your maintenance database. A web browser based maintenance request module that non-FastMaint users can use to request maintenance work is also available as a separate add-on. *(For a list of major features see next page)*

Easy to set task frequency

How much does FastMaint cost?

Prices start at US$ 445[*] per copy (Basic edition). A fully functional, free 30-day trial version is available for download.

Certification/ Awards

FastMaint™ has passed Microsoft's Verified For Windows XP certification test.

Network World magazine rated FastMaint as a **Cool Tool** in the July 2002 issue of Network World Fusion (http://napps.nwfusion.com).

Requirements

FastMaint 4.2 requires Microsoft Windows™ 98/ Me/ 2000/ XP with a minimum of 32MB RAM and 29MB disk space available.
