FTPSuite™

for **REAL**basic   Version 4.1

New Features

AbortTransfer – Abort current FTP operation but stay logged in.
RestartGetSingleFile Smart Command – Continues previously interrupted download of a single file.
RestartPutSingleFile Smart Command – Continues previously interrupted upload of a single file.

Note: FTP Suite 4.1 is only compatible with REALbasic 5.5.x, due to its use of features unique to REALbasic 5.5.x.

Bug Fixes

ParseDirListLine now properly parses file and folder name that contain spaces on the standard FTP Server included with Windows.
